Day 1: 2003 International Building Code Fundamentals with NYS amendments (Our 2007 edition)

Introduces the critical concepts of the 2003 *International Building Code* ® (IBC ®). (6 contact hours)

Overview:

Discusses critical concepts of the 2003 IBC. Provides a basis for the correct use of the code in the design, plan review, inspection and analysis of projects. Promotes a clear understanding and correct use of the requirements identified by these basic code provisions, tables and categorizations allows code users to apply the code in clear-cut situations, and helps to build their understanding of the intent of the code when asked to make code compliance decisions.

Instructor: TBA

Day 2: Fire Alarm Basics

Discusses critical concepts of the 2003 International Fire Code (IFC). Provides a basis for the correct use and application of the code. Builds an understanding of the intent of the code through detailing basic tables and categorizations. (8 contact hours)

Objectives:

Upon completion, participants will be able to:

- Identify fire code enforcement issues related to:
 - Administration and general precautions.
 - Building and equipment.
 - Processes and occupancies.
 - Hazardous materials.
 - Identify code enforcement issues and key sections in each chapter.
- Describe the application of the code to inspection, plan review and code enforcement

Day 3: Fire Alarm Inspection, Testing & Maintenance

Discusses critical concepts of the 2003 International Fire Code (IFC). Provides a basis for the correct use and application of the code. Builds an understanding of the intent of the code through detailing basic tables and categorizations. (8 contact hours)

Objectives:

Upon completion, participants will be able to:

- Identify fire code enforcement issues related to:
 - Administration and general precautions.
 - Building and equipment.
 - Processes and occupancies.
 - Hazardous materials.
 - Identify code enforcement issues and key sections in each chapter.
- Describe the application of the code to inspection, plan review and code enforcement

Instructor: Merton Bunker ~ Merton earned a B.S. in Electrical Engineering from the University of Maine and an M.S. in Engineering Management from Western New England College. He is a registered professional engineer in six states and the District of Columbia, a certified fire and explosion investigator, a certified master electrical inspector. He has over 22 years of engineering experience, including seven years at the National Fire Protection Association (NFPA). Merton is a member of the SFPE, NFPA, IEEE, NAFI, and IAAI and is also a member of the Stafford (VA) County Fire and Rescue Department, and continues to teach fire alarm related classes for NFPA.

Merton is a principal member of the following NFPA committees:

- TC on Inspection, testing & Maintenance of Fire Alarm Systems (NFPA 72)
- Technical Correlating Committee on Signaling for the Protection of Life and Property (NFPA 72)
- NEC Technical Correlating Committee (NEC)
- TC on Maintenance of Electrical Systems (NFPA 73)
- TC on Air Conditioning Systems (NFPA 90A)
